

Pedal Filter – v. 1

Thank you for purchasing your new pedal filter from basherboards.com!

This filter was hand built and tested thoroughly before being shipped. If you are not completely satisfied with its performance, you can return it at no charge for a full refund.

Comments or Questions - email support@basherboards.com

Instructions For Use

1. Turn off your wheel.
 2. Unplug the pedal cable from your wheel.
 3. Plug the pedal cable you just removed from the wheel into the connector labeled "PEDALS" on your new pedal filter box.
 4. Plug the supplied cable into the now open pedal connection on the wheel.
 5. Plug the other end of the supplied cable into connector labeled "WHEEL" on your pedal filter box.
 6. Turn on the wheel and enjoy smooth, working inputs!
- There is nothing special about the supplied cable... Its connections are identical to the one supplied with your wheel and they are interchangeable.
